

Proposed Solution Specification

Integrated Healthcare Scheduling Suite

1. Module Architecture

- **Authentication Module:** Standard signup pathways separating profiles (Patient, Doctor, Admin). Uses encrypted tokens for security.
- **Interactive Search and Filtering:** Dynamic sidebars containing experience sliders, rating scales, and specialized medical indicators.
- **Queue and Prescription Panel:** Doctors see incoming queues, click update statuses, write diagnostics, and submit prescriptions.
- **Admin Management Hub:** Provides tools to add doctors, verify credentials, and review user accounts.
